Report on the Fundraising Event

Introduction

The aim of this report is to describe the fundraising event organised by the school, evaluate how successful it was and suggest or recommend some improvements for the future.

Description of the event

The event took place in the school on Sunday afternoon. Students and parents organised different activities, including a raffle, games, a cafeteria in the dining hall and a really good lottery of soccer jerseys. Most students helped with the organisation, while parents were in charge of supervising everything.

How successful was it?

Overall, the event was successful. A large number of students, parents and other people attended, and we managed to raise a good amount of money for the school trip in September of the next year. Not only did the event help us collect money, but it also gave students the opportunity to work together and have fun.

However, there were some problems. The queues for the cafeteria in the dining hall were too long, and some activities did not have enough materials. In addition, the event could have been advertised more earlier.

Recommendations

For future events, my recommendations are as follows: preparing more food and materials from before. It would also be a good idea to advertise the event on social media, like Instagram or Tik Tok several weeks before. Another improvement would be to have more students helping at the most popular event.

Had we planned these aspects better, the event would have been even more successful.

Conclusion

In conclusion, the event achieved the main point and was a positive experience for the school. With a few improvements, I believe that a similar event could raise more money next time.
